Good afternoon, everyone!

On behalf of the TIME 2025 Organising Committee, I'm very pleased to welcome you to our workshop at The Web Conference 2025.

My name is Lei Wang. I'm from Griffith University and Data61/CSIRO, and it's my honor to be your host today.

I'd like to start by sincerely thanking our organizing team, our distinguished keynote speakers, workshop coordinators from ANU, our area chair, our reviewers, and all our collaborators and supporters who have helped bring this event to life.

We're excited to have researchers, practitioners, and experts from around the world joining us today, both in person and online.

TIME 2025 stands for Transformative Insights in Multi-faceted Evaluation.

Our mission today is simple but ambitious:

To translate advanced research into practical, actionable solutions that address the real-world challenges of web technologies.

Our workshop brings together innovations in privacy, fairness, security, semantic understanding, and ethical AI, across multiple domains.

We want to explore how ideas from different fields, like healthcare and cybersecurity, can help us build a Web that is not only smarter but also more responsible, fair, and trustworthy.

We have a very exciting program ahead.

First, we are honored to feature two distinguished keynote speakers:

- Assoc. Prof. Wei Liu from the University of Western Australia, who will talk about advancing Causal Reasoning Agents.

- Assoc. Prof. Rafiqul Islam from Charles Sturt University, speaking on Advancing Cybersecurity and Ransomware Detection.

We also have two oral presentation sessions featuring cutting-edge research, from self-disclosure dynamics and action recognition to ethical AI in healthcare and large language models.

Toward the end, we will host an interactive panel discussion where we invite you to join the conversation on how we can bridge innovation and responsibility in the evolving Web landscape.

And finally, we will announce two best paper awards.

We encourage all of you to participate actively throughout the day!

Please feel free to ask questions during the Q&A sessions, engage with our speakers and panellists, and share your thoughts and experiences.

For in-person attendees, you can simply raise your hand during Q&A.

For virtual participants, you can post your questions via the chat.

Your insights and diverse perspectives are what will make today's discussions richer, more dynamic, and more impactful.

A few quick notes:

-We'll have a coffee break at 3:00 PM for about 30 minutes, a good opportunity for informal discussions.

-Each keynote and oral presentation session will be followed by time for questions and answers.

-Our session chairs, including Dr. Syed Islam, Dr. Md Zakir Hossain, and myself, will be here to guide the sessions and keep everything running smoothly.

For our online participants, please make sure you have access to the chat and Zoom tools if you would like to interact during the sessions.

Finally, to kick off our first session, I'd like to invite Dr. Syed Islam, Senior Lecturer from Edith Cowan University, who will be chairing the first keynote session and formally introducing our first speaker.

Thank you all once again for being here, we look forward to a wonderful day of discussions and ideas.

Dr. Islam, over to you.
